### BE Licence

mpv weight 3500kg

Caravan weight over 750kg

### BE Licence

4X4 weight 3500kg

Caravan Weight over 750kg

## ICCC Recommended

The ICCC like many other caravan clubs, recommend that you only tow a caravan that weighs 85 per cent or less of your car's weight. Those who are experienced at towing may go up to 100 per cent of the car's weight, but no-one should tow a caravan that is heavier than the towing limit of the vehicle it's behind. Legally, if you add together the Gross Vehicle weight of your car and the Gross vehicle weight of your caravan, the total weight must not exceed the Gross Train Weight or maximum towing weight of the car.

The Irish Camping & Caravan Club is a member of the Fédération Internationale de Camping, Caravanning et Autocaravaning
